Health care funding in jeopardy ... national health care policy debate growing ...  
patient and physician rights in peril ... your access to vital information at risk.

THE TIME TO ACT IS NOW.

August, 1990

Dear Doctor:

You can still take advantage of a special six-month membership offer in the American Medical Association. But time is running out.

This six-month offer entitles you to full benefits of AMA membership. JAMA, AM News, career assistance programs, access to invaluable medical information and discounts on essential materials for your practice (check out the enclosed insert on the Drug Evaluations Subscription).

**But above all, as a member you can help us continue  
vital work on behalf of Physicians and their patients.**

Right now, the AMA is acting on key health care issues facing all of us. Smoking. The environment. AIDS. Crucial research in countless areas. Support of medical education. Adolescent, minority and women's health care concerns.

And the AMA is actively supporting the passage of the important "anti-hassle" legislation now in Congress. This important bill could reduce the third party interference that confronts all doctors and hampers our ability to practice medicine.

As a member of the AMA, you can help our work continue. And now more than ever, we and our patients need a viable, responsive and respected voice of reason in the key medical debates confronting us.

For over 140 years, that voice of reason has been the American Medical Association. And today, our membership is more active and more diverse than ever before. It's time you joined.

But the time to take advantage of our special introductory six-month membership is running out. So don't delay. Complete and return the enclosed application in the supplied postage-paid envelope now.

Sincerely,

A handwritten signature in dark ink, reading "James S. Todd M.D." in a cursive style.

James S. Todd, M.D. Executive Vice President

P.S. Remember, the AMA is a democratic organization. You can have a say in policy. The House of Delegates is scheduled to meet in December. If you want your voice heard at that meeting, don't hesitate to join and become an active member. Return your completed application today.
